

Alcoa Wheel Service Bulletin

Europe - May 2016

DURA-BRIGHT® WHEEL WASH!

DESCRIPTION

- Dura-Bright® surface treatment is designed to be easy to clean and to stay bright and shiny when properly maintained. Therefore Alcoa developed the Dura-Bright® Wheel Wash to provide a safe product to use on both XBR® and EVO Dura-Bright® wheels. As it has been developed and approved by Alcoa Wheels, it gives customers the assurance that they are cleaning their wheels with a safe cleaning solution and a product with additional benefits.
- It is especially developed and tested by Alcoa for weekly use on Dura-Bright® wheels and it helps to prevent the buildup of brake dust resin and copper glow

ADVANTAGES

- No need to dilute
- Only 100 cc needed per wheel
- Helps to prevent brake dust resin and copper glow.
- No risk of damaging wheels with harsh chemicals
- Neutral non-chemical fragrance
- Soft red color to distinguish from ALclean
- Not classified as dangerous goods according CLP and Reach directives
- Safety data sheet is available

PACKAGING

- Starter kit which includes a 1L bottle of Dura-Bright® Wheel Wash and one ALbrush2
- 5L bottles
- 25L bottles

AVAILABILITY

- Estimated lead time : June 2016
